File Encryption Demo Report

Generated for the permission-isolation demo.
This PDF is a binary test sample: if encryption
corrupts a single byte, the file will not open.

Roles

Xiao Kong - encrypt only, no decryption rights
Xiao Zhang - holds the private key, can decrypt
Builder   - owns the server, cannot decrypt (V2)

Algorithms

AES-256-GCM for file content
RSA-OAEP-2048 (SHA-256) for key wrapping
PBKDF2-SHA256 250000 iterations for the key package

SHA-256 of the original file should match after decryption.
